

PRESENTATION OF STEFANO COLASANTO

I would like to be elected to the ICAP Board because I believe I could effectively help promote the association's name, concepts, and values.

I am a dentist, an orthodontist, and an osteopath. In 2000, I studied Myofunctional Therapy according to Garliner, and since then, I have applied it to my patients, modifying it through the lens of osteopathic philosophy. It is since about that year that I started to release tongue ties, first in children and adults, and then in newborns. Nowadays, I perform about 700 surgeries per year. In my clinic in Rome, I work with 7 dentists, another osteopath, and two SLPs.

I had been on the President's Board of the Italian Dental Association and Delegate for Foreign Affairs for the last 10 years.

I ran into ICAP after reading Baxter's Tongue-Tie book, and I attended the 2024 Convention in Cleveland with a presentation and a poster. Then, I have been on the Organizing Board of the first European ICAP Meeting in Dublin in June 2025.
